

Who We Are

Homes for Animal Heroes (HAH) is a national program dedicated to rehoming retired research dogs and sharing knowledge about the important role animals play in finding cures to disease.

The HAH network is comprised of HAH staff, volunteers, and research facilities who all work together in order to accommodate retired research dogs in every state across the country, one location at a time. Our goal is to permanently rehome these animal heroes into loving homes through a comprehensive foster-based program.

HAH Mission:

Provide permanent, loving homes for retired research animals through a nationwide rehoming network

Educate the public about the benefits of biomedical research relating to human and animal health and well-being

Present an accurate representation of the care and consideration researchers provide for the animals they work with each day

Work collaboratively with the research community to promote awareness and develop a cohesive rehoming network

NAIA
National
Animal Interest
Alliance

Homes for Animal Heroes is a program of National Animal Interest Alliance (NAIA). NAIA was founded in 1991 with the mission to promote the welfare of animals, to strengthen the human-animal bond, and safeguard the rights of responsible animal owners, enthusiasts and professionals through research, public information, and sound public policy.
